## **CITY TO COMMENCE 2007 ASPHALT CONCRETE OVERLAY PROJECT**

The City of Vacaville will be commencing the 2007 Asphalt Concrete Overlay Project as early as this week, November 26, and continuing over the next three months.

The work to be done consists of resurfacing Brown Street, from East Monte Vista Avenue to Browns Valley Parkway, and Fruitvale Road, from Stinson Avenue to the west side of Ulatis Creek Bridge in front of the new Meadowood Subdivision. Approximately 1.18 miles of roadway will receive an overlay with this project. Accessible ramps will be removed and replaced in accordance with ADA standards. Valley gutters will also be removed and replaced.

The City awarded the \$556,248 contract to Central Valley Engineering and Asphalt from Roseville on October 23. This is their first job here in Vacaville. The majority of the work will occur between the hours of 8 a.m. and 4 p.m. The contractor will notify residents affected by the overlay project at least seventy-two (72) hours in advance of any lane closures.

Local gas tax revenues and Traffic Congestion Relief monies are providing the funding for the overlay project.

Arterials receive an overlay every ten years for cost-efficient preventive maintenance. The cost for a complete road reconstruction is much higher than the cost to overlay a road when comparing dollars per life of road. Overlaying the road will ensure the road structural section will last longer and maintain better drivability.
