Information about City events, activities, programs, as well as info about your sewer/water account is posted here.

Water Service charge determined by meter size connection (5/8", 3/4", or 1" for typical residence). The meter size connection defines the amount of water available to you on demand, and is billed regardless of the amount of water used. This helps to cover the fixed costs of having quality water available 24 hrs per day.

Water consumption has a two-tiered billing system during normal water years.
 Tier 1 billing 1-12 units
 Tier 2 billing > 12 units
 Effective March 1, 2011

12 units X 1.12 = 13.44
 22 units X 1.53 = 33.66
 34 units = \$47.10

Water Units used in the Last Year

NOTE: Meters measure water in hundred cubic feet (hcf). One water unit = 1 hcf = 748 gallons

 Sewer variable units are based on your average household water use during winter months. Your use is recomputed annually in the Spring. Average residential sewer use is 17 units bimonthly.
 17 units x .51 = \$8.67

Voters passed Measure I in 1988 to pay for municipal improvements and uses Utilities billing system to collect this tax.

Current Charges 174.09

Balance Due UPON RECEIPT \$174.09

Current Charges Delinquent After 7/26/2011

Consumption graph displays water units used by the customer throughout the previous 12 months and allows for comparison of use between current billing period (34 units) and the same period last year (35 units).

Keep this portion for your records.
