

New Park-and-Ride Lot at Davis Street and Bella Vista Road will Include Photovoltaic Panels

A number of improvements are being made along Davis Street and Bella Vista Road, which will make the area more efficient and safer. Improvements to the intersection include the realignment of Bella Vista Road-Davis Street and a Park-and-Ride Lot project. The work, which is scheduled for completion in August, 2004, improves traffic circulation in the Davis Street and Bella Vista Road corridor. It especially improves the efficiency of the flow of traffic and provides better safety for motorists. The new Park-and-Ride Lot is the third for Vacaville.

Something new about the Bella Vista Road/Davis Street Park-and-Ride Lot is that it also includes a photovoltaic installation to reduce operating costs and conserve energy. With the installation of solar panels at the facility, Vacaville joins other communities across the state in efforts to make use of clean, renewable energy.
